Please print out and complete the form below, and include with your pipettes.

Your Details:
Name:

Organisation:
Address:

Tel: email:

Section A
If pipettes have been used for pathogenic, toxic or radioactive material.

These pipettes have been used for (describe nature of hazard):

And have been decontaminated using:

(e.g. Decon, Virkon, Hypochlorite, 70% Ethanol, formaldehyde etc, and method e.g. overnight soaking, autoclaving (CHECK with pipette manufacturer before autoclaving: some pipettes cannot be autoclaved))

Section B
If pipettes have NOT been used for pathogenic, toxic or radioactive material.

In this case you do not need to do decontamination, but you do need to indicate the kind of solutions for which the pipettes have been used (e.g. PCR, general lab pipetting).

These pipettes have been used for:

Please Sign: …….. and Date: …….
